

PROFESSIONAL SUMMARY

Computer Engineering and Information Technology student with practical experience in software development, web application development, hardware maintenance, cybersecurity, graphic design, and technical problem solving. Experienced with React, Django, FastAPI, JavaScript, Python, databases, Linux, and modern development tools. Combines technical skills with creative design and hands-on hardware experience to build practical, responsive, and user-focused digital solutions.

EDUCATION

University of Dar es Salaam Present

BSc. Computer Engineering and IT • In Progress

Relevant subjects: Data Structures & Algorithms; Computer Architecture; Software Engineering; Database Systems; Computer Networks; Web Development; Operating Systems; Digital Electronics.

Karatu Boys Secondary School 2023

Advanced Certificate of Secondary Education • Division 1.5

Relevant subjects: Physics; Geography; Mathematics; General Studies; English Language.

Pareni Secondary School 2020

Certificate of Secondary Education • Division 1.11

Relevant subjects: Mathematics; Physics; Chemistry; Biology; English; Kiswahili; Geography.

PROFESSIONAL EXPERIENCE

Practical Training — Hardware & Cybersecurity

Aug 2026 – Present

TRA-PSSSF, Dar es Salaam, Tanzania

- Handling hardware maintenance and diagnostics.
- Working hands-on with cybersecurity tools including Snort and Nmap.

Practical Training — Full-Stack Developer

Jul 2025 – Sep 2025

StarHub Africa, Dar es Salaam, Tanzania

- Worked as part of a team that built MediBridge, a web and mobile platform connecting patients and doctors.
- Focused on online appointment booking to help reduce in-hospital waiting times.

Practical Training — Software Development

Jul 2024 – Sep 2024

UDICTI Finhub, Dar es Salaam, Tanzania

- Learned and applied Django, HTML, CSS, and JavaScript in real project work.
- Built early full-stack features using React and Vue alongside the development team.

PROJECTS

NyumbaLink

Django REST Framework • PostgreSQL • Celery • Redis

A property rental and listing platform for Tanzania featuring JWT authentication, role-based permissions, geolocation search, and Cloudinary media.

- Designed the platform around practical property discovery and rental workflows.
- Implemented backend-oriented features including authentication, permissions, asynchronous tasks, and media handling.

GolaniSDA Church Website

Vue 3 • Django REST • Tailwind CSS • Stripe

A full-stack church platform with a modern frontend, Django backend, media gallery, donations, and a custom administration interface.

- Built around church communication, media presentation, and online engagement.
- Integrated a responsive frontend with backend services and payment functionality.

AI Student Support Assistant

FastAPI • Ollama • Gradio • Python

A university project pairing a FastAPI backend with a local Ollama language model and Gradio interface to answer student queries.

- Combined an API backend, local AI model, and lightweight user interface into a single student-support application.

Smart Water Tank Automation

Arduino • C++ • HX711 • IoT

An Arduino-based automation system using an HX711 load cell for tank-level sensing, tare calibration, and pump failsafe logic.

- Applied embedded systems concepts to automate water-level monitoring and pump control.

TECHNICAL SKILLS

Frontend Development	React, JavaScript, TypeScript, HTML/CSS, Tailwind CSS, Next.js
Backend Development	Node.js, Python, Java, Express.js, FastAPI, Django
Mobile Development	Flutter, Dart, Android
Database & Storage	PostgreSQL, MySQL, Redis
Design Tools	Figma, Canva, Adobe XD, Photoshop
DevOps & Tools	Git, Docker, AWS, GitHub, Linux
Cybersecurity	Snort, Nmap, practical security tooling and system diagnostics

ADDITIONAL STRENGTHS

Creative: Graphic design, video and photo editing, branding, posters, and digital content. Hardware: Hardware diagnostics, OS installation, system recovery, and data backup. Music: Piano performance, supporting creativity, focus, and discipline.

CONTACT & AVAILABILITY

Available for software development, web projects, technical support, hardware-related work, creative technology, freelance collaboration, and practical training opportunities.
